

Curious about our guest's fishing experiences in 2011? Of course you are. That's why we have included this page that depicts the time of year against our guest's catches. Remember that all these fish were released so this in turn increases your opportunity as a Fireside guest to experience the same fabulous fishing. The information was attained randomly from Fireside Lodge guests at the end of their fishing day. They are a sampling of experiences. There are many, many more!

Size of fish? We figured that would be your next question. At Fireside Lodge our guests catch a lot of large fish. Check this out: Smallmouth Bass: many caught are 15 to 18". This is a great sized Smallie. A lot caught are between 18 and 20". Largest caught was 25". What a monster. Northern Pike: commonly are 28 to 36". Over 40"ers are released every year. Largest caught was 48". Muskie: 32 to 42" are common and many guests have caught this size. We have catches between 43 to over 50" every year. The largest since our tenure is 54". Click on the following links at www.firesidelodge.com or www.firesidelodgefishing.com to view weekly photos and fishing reports from the current and previous seasons: Weekly Fishing Report and Weekly Photos 2011
